

Kärcher PGG 3/1 Stroomgenerator

General characteristics

Brand	Kärcher
Subcategory	Standard power unit
Year of construction	2026
Colour	Black
General state	Very good
Fuel	Petrol
Emission class	stage_5
Reference	477
CE marking	Yes

Properties

Single weight	52kg
Length	43cm
Width	59cm

Technical specifications

Assets	3kw
--------	-----

Description

Compact, highly mobile and at the same time powerful synchronous generator PGG 3/1 with an output of 2.8 kW for self-sufficient power supply, e.g. on construction sites, in agriculture or in municipal enterprises. The reliable 4-stroke petrol engine ensures constant power, sophisticated safety technology with protection against overload and oil shortage ensures safe operation, and leak-proof wheels and a folding handle allow easy transport of the user-friendly unit. The 2 AC sockets are equipped with an automatic voltage regulator (AVR) and are therefore also suitable for operating sensitive electronic equipment. With operating times of up to 12 hours (6.5 hours at full load) with a 15-litre tank filling, complete working days can be covered without any problems
